## **ADMB Accepting Applications for Funding Proposals**

Cheyenne – The Wyoming Animal Damage Management Board is accepting applications for predator management projects that would enhance wildlife populations, improve public health and safety, protect livestock or strengthen predator management using ADMB funds.

Individuals, organizations, or government agencies may apply. The board seeks proposals that reflect a cooperative, integrated approach. Applications must be received by 5 p.m. on June 15.

Examples of projects that the ADMB has funded to date include:

- Wolverine presence in Wyoming
- Black Bear/Grizzly Bear/Mountain Lion Livestock Depredation Prevention
- Methods for coyote birth control and population management
- Predator management on Whiskey Mountain to enhance lamb survival
- Predator management for supplemental Big Horn Sheep Transplant
- Identification of predators affecting sage grouse nesting sites and the mule deer population
- Credible Baseline Wildlife Data Collection
- Habitat use and population dynamics of Shira's moose
- Coyote management to enhance antelope and deer fawn survival
- DNA analysis for control of predatory wolves
- Preemptive human/bear conflict mitigation

The application form requires that the geographic size and public benefit of the project be added to the form and that a map of the area of the proposal be included in the application package.

For further information about the ADMB or a copy of the application, visit the ADMB website at [www.wyadmb.com/resources.htm](http://www.wyadmb.com/resources.htm) or call Hank Uhden at (307) 777-6433.
